Why episodes of care?

Blue Shield of California's episode of care program aims to transform how specialty health care services are delivered by shifting away from traditional fee-for-service (FFS) to value-based care in an episode of care arrangement. The focus of an episode of care arrangement is providing coordinated, collaborative care across the health care continuum to ensure that patients receive the highest quality and most comprehensive care.

What is an episode?

Episodes of care encompasses the full spectrum of services related to a given procedure during a specific time frame. The episode can include services from multiple providers and facilities, but the episode is designed to only include costs relevant to that procedure.

Based on PROMETHEUS episode definitions
Professional + Facility + Labs + Rx

Example of a Maternity Episode

Retrospective vs. prospective models

To minimize operational challenges in modifying the current claims adjudication system and to ensure providers can participate in our payment model (regardless of the size of the practice or organizational structure) Blue Shield is offering a retrospective payment model. It is important to understand the differences between retrospective and prospective.

Retrospective

In a retrospective model, providers are paid on a FFS basis for services related to the episode during the defined time frame. At the end of performance period, there is a financial reconciliation with the potential for shared savings depending on whether the FFS claims costs were above or below the pre-defined established target.

Provider continue receiving FFS payments

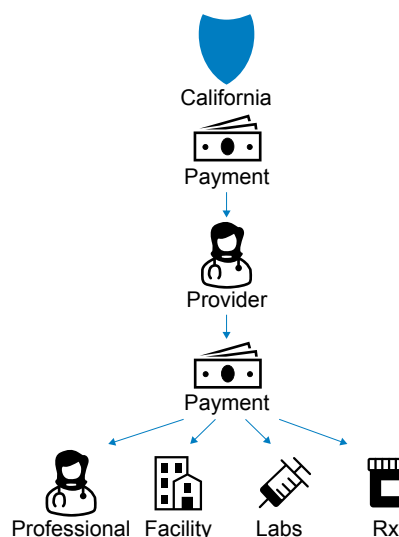

Does not require modification to existing claims adjudication system

Shared saving reimbursement after services rendered and reconciled

Providers receive upfront negotiated payment at the start

Requires new, or modifications to existing claims adjudication

Provider saving obtained by managing downstream cost

Prospective

In a prospective model, a fixed price for services that are covered within the episode are paid out prior to any services being rendered. The fixed amount covers the total cost of care associated with that episode and providers are responsible for managing cost and facilitating payment to the various providers and facilities. If costs go beyond the fixed amount, the provider is at risk and responsible for those costs. However, if the cost of care is below the fixed amount, the provider benefits from any savings achieved.

PROMETHEUS methodology

PROMETHEUS Analytics® is a standardized grouping methodology developed to bundle claims data to create episodes of care that can be used to design and operationalize value-based payment models. PROMETHEUS supports performance evaluations in order to improve the quality of care and patient outcomes. Blue Shield utilizes PROMETHEUS analytics for episodes of care logic.

Episode triggers

For each episode of care, PROMETHEUS Analytics defines sets of trigger codes (ICD-9/10 diagnoses and procedures, CPT, HCPCS) along with target sequence (i.e., principal or any), type of claim with which code should be associated (i.e., inpatient or outpatient facility claims, or professional claim) and any temporal relationship among combinations of claims (e.g., relevant professional claim within a predefined number of days of facility claim).

Episode window

For each episode of care, PROMETHEUS Analytics® defines the default duration of the pre- and post-trigger windows. Additionally, system-related failure and most acute medical condition episodes have no pre-trigger window, and most procedural episodes have suggested 30, 60 or 90 day post-trigger windows. Specific parameters can be provided upon request.

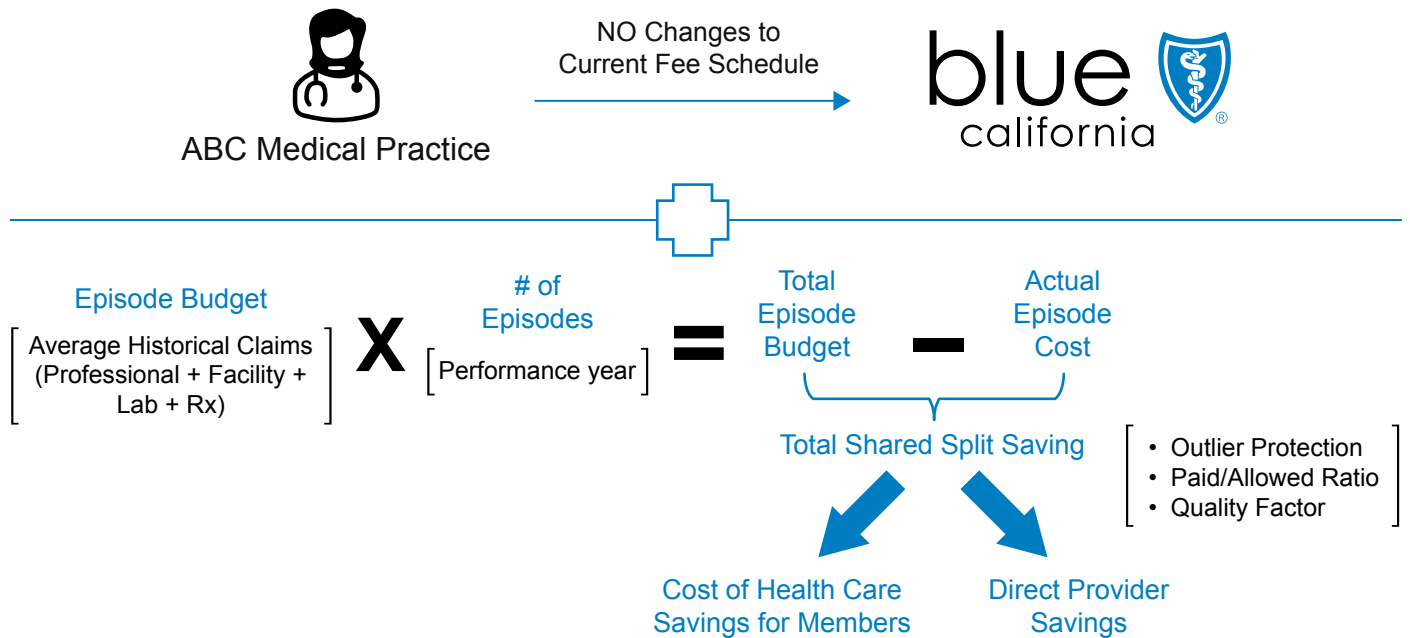

Services included

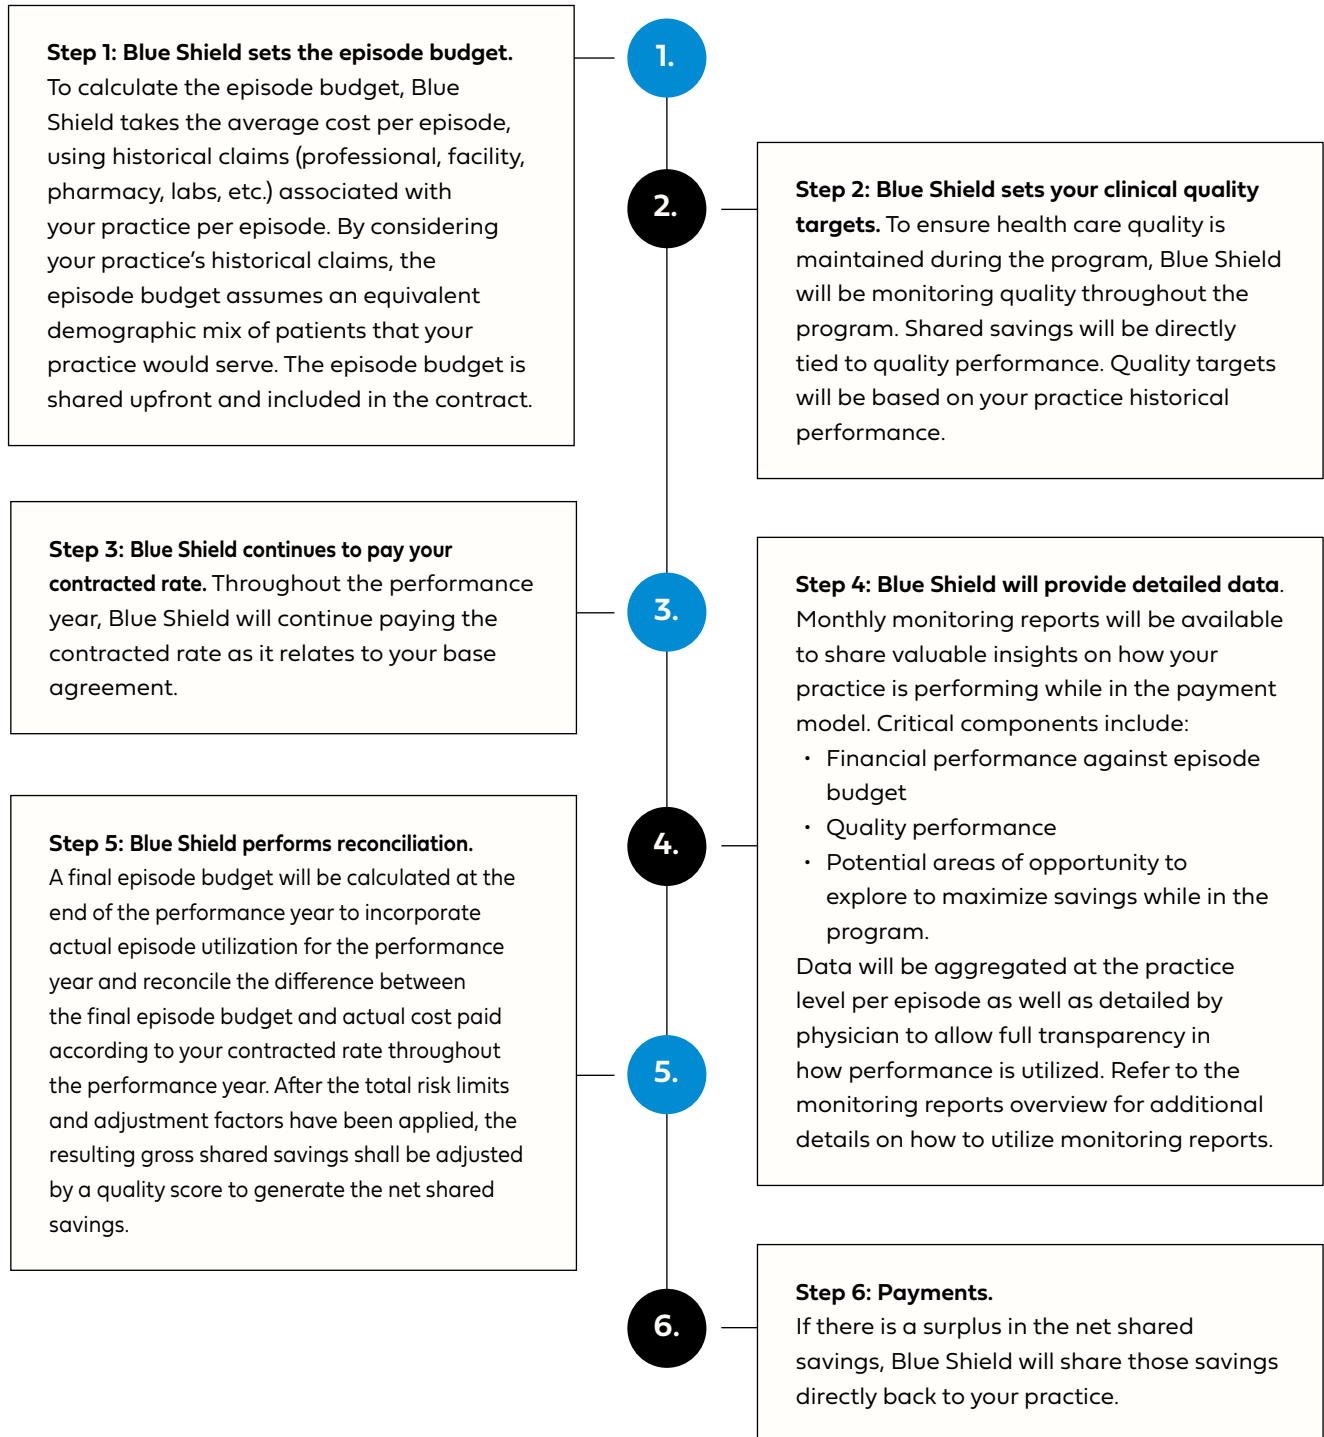

PROMETHEUS Analytics® defines service assignment rules that determine to which episode(s) each service is associated, and whether these services should be considered typical or a potential complication. These rules are comprised of both episode-specific diagnosis and/or procedure code sets to identify and classify relevant claims, as well as a hierarchical set of logic rules that take into account claim type, episode type and temporal relationships among services. Specific code sets can be provided upon request.

How does this model work?

This payment model works by setting a total episode budget at the start of the performance year and comparing that to what was paid traditionally FFS. If a practice comes in under budget while meeting quality metrics, Blue Shield and the practice receive a share of the savings.

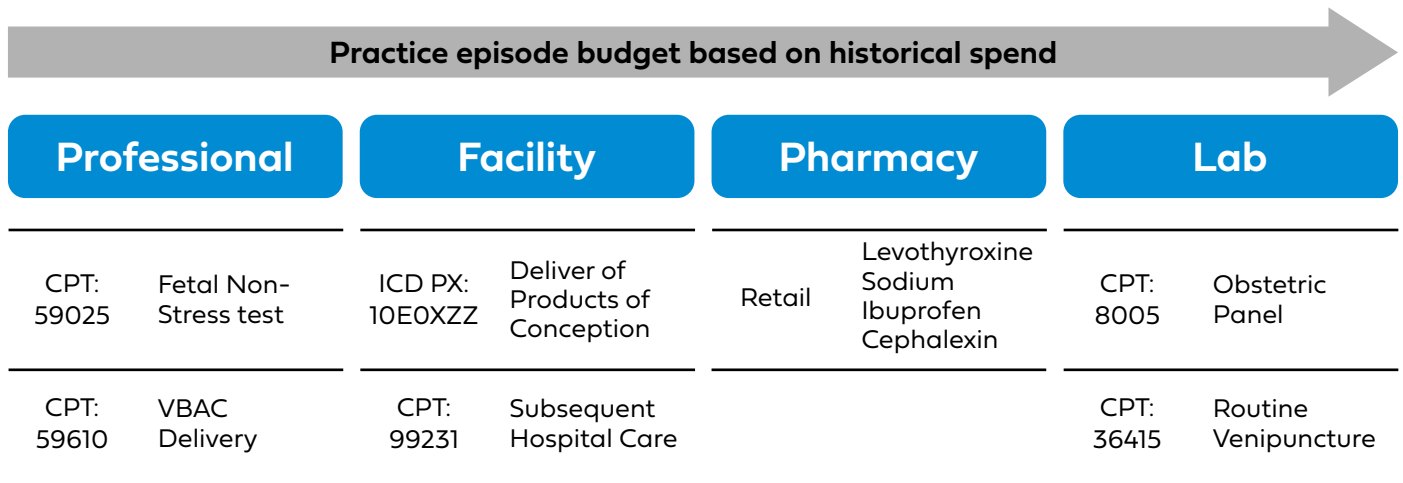

Components of the model:

Budget setting:

Each episode budget will be calculated based on your practice’s historical performance. All claims associated with the episode per PROMETHEUS methodology will be included in budget cost.

Example based on PROMETHEUS episode definitions
Detailed inclusions/exclusion can be provided upon request

PROMETHEUS can differentiate between claims that are directly associated with the Episode. If there are claims outside the realm of that Episode, those claims will not be included in the budget as well as calculations for that performance year.

Individual Family Plan (IFP) vs Group Plans

Your budget will be broken down by two separate budgets per line of business.

- IFP: insurance health plans that is purchased individually or family basis, as opposed to obtaining through an employer
- Group: insurance health plans that provide coverage to a group of members, usually comprised of company employers or members of an organization

Different budgets represent different contracted rates set per line of business.

Clinical quality

Clinical quality is a critical component of episodes of care. Each episode will have its own set of quality metrics and applicable weight distribution to incentivize improvement and reward continued high performance. Improvement towards achieving quality targets will be translated to an overall “quality score” that is used to adjust the practice portion of the final net shared savings result.

Quality Metrics	Standard Outcome Score	Maximum Outcome Score
Member Experience	10%	
Episodes with Emergency Department Visits	30%	
Depression Screening*	20%	30
Hepatitis B Screening*	20%	30
Prenatal and Postpartum Visit*	20%	30

*Measures that extend to a Maximum Outcome Score

Baseline and target setting approach

Blue Shield will take your practice’s average historical performance of each metric to determine your baseline. If your historical baseline is at 0%, the target will be increased to allow for potential deviations from your historical experience.

For measures that have an additional incentive opportunity, (i.e Depression Screening, Hepatitis Screening, Prenatal and Postpartum Visit) your baseline will correlate to separate tiers. The tiers will determine your annual target above the set baseline. To allow for additional incentives, there will be 2 targets set; a “Standard Outcome Score” and a “Maximum Outcome Score”. Baselines and targets will be reset annually to ensure quality performance is improving throughout the program.

			Target	≥Target
	Baseline	No Savings	Standard Outcome Score	Maximum Outcome Score
Tier 1	0-49%	<Baseline	+ 5.0% above Baseline	+ 7.5% above Baseline
Tier 2	50-74%	<Baseline	+ 2.5% above Baseline	+ 5.0% above Baseline
Tier 3	75-89%	<Baseline	+ 1.0% above Baseline	+ 1.5% above Baseline
Tier 4	>90%	<5% Baseline	<2.5% Baseline	Baseline

Clinical quality supplemental data

To minimize additional administrative workstreams, all quality metrics used will be claims based measures. Although there are no supplemental data requirements, the quality measures being tracked may require a change in how certain claims are coded. A detailed coding file can be provided upon request to outline specific codes that are used to track quality metrics. Regular reporting on performance relative to quality metrics will be included in monthly monitoring reports as they become available.

Member Experience

Blue Shield will administer a member experience survey to members who have participated in the episode. Members will be contacted by mail, email, or phone and asked to complete/return the survey. All responses are anonymous. Only questions from the categories noted below will be utilized for the purpose of incentive payment. Blue Shield reserves the right to modify questions annually.

Category	Question	shared savings weight
Rating of personal doctor	Using any number from 0 to 10, where 0 is the worst provider possible and 10 is the best provider possible, what number would you use to rate this provider?	2%
Getting care quickly composite	In the last 6 months, when you contacted this provider's office to get an appointment for care you needed right away, how often did you get an appointment as soon as you needed? In the last 6 months, when you made an appointment for a checkup or routine care with this provider, how often did you get an appointment as soon as you needed?	2%
Someone at office gave test results	In the last 6 months, when your doctor ordered a blood test, X-ray or other test for you, how often did someone from your doctor's office follow up to give you those results as soon as you needed them?	2%
Saw provider within 15mins of appointment time	Wait time includes time spent in the waiting room and exam room. In the last 6 months, how often did you see this provider within 15 mins of your appointment time?	2%
Provider explained things in an easily understandable way	In the last 6 months, how often did this provider explain things in a way that was easy to understand?	2%

Shared savings calculations

Savings cap

A savings cap is the limit of the total dollar amount of savings that your practice would be able to collect of all potential shared savings based off a percentage of the episode budget calculated annually across eligible episodes of care.

Outlier protection

Outlier protection is the limit of total dollar amount of eligible expenses that your practice would be responsible for above and beyond the episode budget calculated for each individual episode of care.

Paid/allowed ratio

When calculating the episode budget “allowed” cost is used versus “paid” cost because the “paid” cost is variable as it incorporates the member’s benefit. If “paid” costs were used for the budget, then the member benefits would skew the budget. Since the “paid” cost is the final cost paid out from the plan, we need to adjust for the member’s responsibility, which is why the paid/allowed ratio will be included. This adjustment will accurately reflect the actual saving accumulated from the model to be shared back with your practice.

Share savings illustrative example

An example, for illustrative purposes only, of how provider's final earned shared savings is calculated is included below to demonstrate the application of the savings cap and provider's shared savings with the quality score applied.

EXAMPLE: Shared Savings Calculations			Definitions / Calculations
A	Episode Budget	\$25,000	Based on historic total episode cost (includes all professional, facility & pharmacy claims)
B	# of Episodes	100	# of Episodes during the Performance Year
C	Total Episode Budget	\$2,500,000	(C) = (A) x (B)
D	Average Allowed Episode Cost	\$22,000	Actual cost of Allowed Episode cost (includes all professional, facility & pharmacy claims)
E	# of Episodes	100	# of Episodes during the Performance Year
F	Total Allowed Episode Cost	\$2,200,000	(F) = (D) x (E)
G	Gross Shared Savings	\$300,000	(G) = (C) - (F)
H	40% Savings Cap	\$1,000,000	(H) = (C) x 40%
I	Capped Gross Saving	\$300,000	(I) = lesser of (G), (H)
J	Paid / Allowed Ratio	83%	Adjustment factor to account for member benefit
K	Adjusted Gross Shared Savings	\$249,000	(K) = (I) x (J)
L	Quality Score	100%	Aggregated per metric quality score
M	Providers Shared Savings Split	50%	
N	Providers Share in Savings	\$124,500	(N) = (K) x (L) x (M)
O	Final Providers Net Shared Savings	\$124,500	(O) ≤ (I)

Monitoring Reports Overview:

Provider Summary Closed Tab

Retrospective Monitoring Report - Contract Entity Summary, Closed Episodes Only

Contract Entity Name: ABC OBGYN

Episode Name(s): Maternity

Measurement Period: 1/1/2021-12/31/2021

Report Run Date: 11/19/2021

Date Through: 10/31/2021

Purpose: This report captures episodes that are closed with administrative claims runout. The aggregate financial calculations on this tab are final and provide insights into cost and quality performance for the group and for individual physicians.

Closed episodes are defined as any episode in which the end date is 90 days or longer from the latest date in the current dataset, to allow for adequate claims runout.

Monitoring Reports Overview:

Provider Summary All Year-to-Date

Retrospective Monitoring Report - Contract Entity Summary

Contract Entity Name: ABC OBGYN

Episode Name(s): Maternity

Measurement Period: 1/1/2021-12/31/2021

Report Run Date: 11/19/2021

Date Through: 10/31/2021

Purpose: This report captures all episodes year-to-date (YTD) and should be used to understand care patterns at the group and physician level, to assess over-utilization and/or unnecessary services. In addition, this report can give providers a preview of any episodes that may be going over-budget before they have closed. Finally, there is a column at the end of the individual provider table – “Opportunities” – that provides insights into individual physician opportunities relative to the group. The financial and quality calculations on this tab are a snapshot of current performance and should be reviewed with the knowledge that the episodes may be missing services due to timing.

Monitoring Reports Overview:

Episode Detail Closed Tab

Retrospective Monitoring Report - Member Detail for Completed Episodes

Contract Entity Name: ABC OBGYN

Episode Name(s): Maternity

Measurement Period: 1/1/2021-12/31/2021

Report Run Date: 11/19/2021

Date Through: 10/31/2021

Purpose: This report displays the same information as the tab “Provider Summary Closed,” but each line represents information for a single episode. Episodes on this tab are closed with administrative claims runout. The financial values on this tab are final and provide additional insights into cost and quality performance for individual episodes.

- Identifies details of closed episodes including provider, member, and trigger location information
- Metrics include:
 - Savings/loss summary
 - Quality measures
 - Count of visits for post-acute services

Monitoring Reports Overview:

Episode Detail Open, Not At Runout Tab

Retrospective Monitoring Report - Member Detail for Open, Not at Runout Episodes

Contract Entity Name: ABC OBGYN

Episode Name(s): Maternity

Measurement Period: 1/1/2021-12/31/2021

Report Run Date: 11/19/2021

Date Through: 10/31/2021

Purpose: This report captures episodes that are not yet closed, nor at administrative claims runout, and should be used to provide additional episode-level detail to support the “Provider Summary All YTD” tab. The financial and quality calculations are a snapshot of current performance and should be reviewed with the knowledge that the episodes may be missing services due to timing.

- Identifies details of all open episodes including provider, member, and trigger location information
- Metrics include:
 - Savings/loss summary
 - Quality measures
 - Count of visits for post-acute services

Monitoring Reports Overview:

Episode Excluded Tab

Retrospective Monitoring Report - Member Detail for Excluded Episodes

Contract Entity Name: ABC OBGYN

Episode Name(s): Maternity

Measurement Period: 1/1/2021-12/31/2021

Report Run Date: 11/19/2021

Date Through: 10/31/2021

Purpose: Identifies individual episodes excluded from the savings/loss totals as well as the reason for the exclusion.

Raw Data Tab: Detailed episode medical claim information, excluding financials.

RX Raw Data Tab: Detailed episode pharmacy claim information, excluding financials.

Glossary Tab: List of terms found in the report and their definitions.

Tab Sections: Seen in Provider Summary Closed Tab & Providers Summary ALL YTD Tab.

Contract Entity Contract Terms: Overview of contract terms:

- Episode Contract Target [Budget]

Contract Entity Contract Terms				
Contract Entity	Episode Name	Product	Episode Contract Target	ER %
ABC OBGYN	EP0811 - Maternity	Group	\$6,000	2.5%
ABC OBGYN	EP0811 - Maternity	IFP	\$5,000	2.5%

- Quality Baseline Metrics

Contract Entity Performance Statistics: Contract performance for the practice at the product level for closed episodes.

Metrics include:

- Average episode savings/loss summary

Contract Entity Performance Statistics					
Contract Entity	Episode Name	Product	Episodes	Episode Average Savings/Loss to Date	Total Quality %
ABC OBGYN	EP0811 - Maternity	Group	29	\$900	50
ABC OBGYN	EP0811 - Maternity	IFP	34	(\$100)	50
ABC OBGYN	EP0811 - Maternity	Group	4	\$2,907	0
ABC OBGYN	EP0811 - Maternity	IFP	10	\$1,834	10

- Breakdown of quality metric proportions during trigger

- Percentage of episodes by trigger type location and total cost associated with each trigger type location

Contract Entity Performance Statistics					Average Birthing Center Costs
Contract Entity	Episode Name	% Performed Inpatient	% Performed in Birthing Center	% Performed in Other	
ABC OBGYN	EP0811 - Maternity	10	10	10	\$0
ABC OBGYN	EP0811 - Maternity	0	0	0	\$0
ABC OBGYN	EP0811 - Maternity	5	5	5	\$100
ABC OBGYN	EP0811 - Maternity	15	15	15	\$200

- Average count, cost, and visits of post-acute period services

Individual Performance Statistics: Provider performance at the product level for closed episodes, which allows for assessment of how the provider is performing compared to the risk bearing entity.

Metrics include:

- Average episode savings/loss summary

Individual Performance Statistics								
Provider Name	Episode Name	Product	Completed Episodes	Episode Contract Target	Average Episode Allowed	Average RX Allowed	Episode Average Savings/Loss	Total Quality %
Provider 1	EP0811 - Maternity	Group	1	\$1,000	\$5,000	\$4,000	\$2,195	50
Provider 2	EP0811 - Maternity	IFP	4	\$1,000	\$5,000	\$4,000	\$1,349	50
Provider 3	EP0811 - Maternity	Group	1	\$0	\$4,000	\$4,000	\$3,002	0
Provider 4	EP0811 - Maternity	IFP	1	\$0	\$4,000	\$4,000	\$6,040	10

- Breakdown of quality metric proportions during trigger period

- Percentage of episodes by trigger type location and total cost associated with each trigger type location

Individual Performance Statistics							
Provider Name	Episode Name	% Performed Inpatient	% Performed in Birthing Center	% Performed in Other	Average IP Facility Costs	Average Office Ultrasound Visits	Average Office Ultrasound Costs
Provider 1	EP0811 - Maternity	10	10	10	\$0	2.0	\$200
Provider 2	EP0811 - Maternity	0	0	0	\$0	3.0	\$300
Provider 3	EP0811 - Maternity	5	5	5	\$100	4.0	\$400
Provider 4	EP0811 - Maternity	15	15	15	\$373	5.0	\$500

- Average count, cost, and visits of post-acute period services

Capped Closed Episodes: Provider performance at the product level for capped closed episodes. Episodes are identified as capped when the total episode allowed exceeds twice the contract target rate.

Metrics include:

- Average episode savings/loss summary

Capped Episodes								
Provider Name	Episode Name	Product	Completed Episodes	Episode Contract Target	Average Episode Allowed	Capped Episode Allowed	Episode Average Savings/Loss	Complications %
Provider 1	EP0811 - Maternity	Group	1	\$5,000	\$20,000	\$10,000	\$2,195	10
Provider 2	EP0811 - Maternity	IFP	4	\$5,000	\$20,000	\$10,000	\$1,349	0

- Breakdown of quality metric proportions during trigger period

- Percentage of episodes by trigger type location

Capped Episodes					
Provider Name	Episode Name	% Performed Inpatient	% Performed in Birthing Center	% Performed in Other	Average IP LOS
Provider 1	EP0811 - Maternity	10	10	10	0.0
Provider 2	EP0811 - Maternity	0	0	0	0.0

Final Year-to-Date Closed (YTD) with Runout - Total savings/loss, by episode type, for closed episodes.

Final Year-to-Date Closed (YTD) with Runout			
Provider Name	Episode Name	Completed Episodes	Total YTD Savings*
ABC OBGYN	EP0811 - Maternity	Group	\$2,346
ABC OBGYN	EP0811 - Maternity	IFP	\$85,011

Frequently Asked Questions

How and when will I know my final shared savings?

After the performance year is complete, all of the episodes are closed, and time is allowed for claims run out. Blue Shield will share the final reconciliation report which will aggregate your practice performance against the set episode budget. Payment of shared savings will vary depending on the duration of the post trigger period of each episode. After the post trigger period is closed, allow for a 3 month claims run out, and another 1 month to finalize processing the shared savings.

What if you have questions about reporting?

If you have questions about monitoring reports, please check the Monitoring reports overview section. If that does not answer your question, please email CareReImagined@blueshieldca.com.

What if I have questions about the program?

Please email questions about the program to CareReImagined@blueshieldca.com. Someone from our team will respond promptly.

Appendix

Maternity	
Episode Summary	
Full Name	Maternity
Abbreviation	MATERN
Description	Services and costs associated with Maternity are grouped together to include the delivery, a 300-day look back period to capture and a 60-day post-discharge period.
Default Parameters	
Age Range	12 - 65
Pre-Trigger Window	30 days
Post-Trigger Window	60 days
